

Health System Improvements Survey

The State of Rhode Island Office of the Health Insurance Commissioner Regulation 2 lists standards to be used by the Health Insurance Commissioner (Commissioner) for the assessment of the conduct of commercial health insurance issuers in Rhode Island for their efforts aimed at improving the efficiency and quality of health care delivery and increasing access to health care services. The standards include the following issuer activities:

1. Directing resources, including financial contributions, toward system-wide improvements in the state's health care system related to quality, access and efficiency, including providing support to local collaboratives, organizations, and initiatives that promote these three goals
2. Participating in the development and implementation of public policy issues related to health

To assist the Commissioner in this assessment, as part of the 2012 small and large employer group rate factor review process for commercial health insurance issuers in Rhode Island, please itemize and quantify your organization's contributions of finances and other material assets to these efforts in Rhode Island in calendar year 2011 in the following table.¹

System-wide Improvement Activity	Brief Description of Activity and How it Promotes Health Care System Quality, Access or Efficiency	Value of 2011 Issuer Contributions

Thank you for your cooperation.

¹ The contributions can be to any entity other than a provider to improve medical and prevention services for all Rhode Islanders and to promote a coherent, integrated, and efficient statewide health care system.
